8.7 Pictograms (2015)

In British Columbia, WHMIS was updated in 2015 to align with the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) developed by the United Nations. The updated classifications, labels, and safety data sheets improve communication, clarity, and worker safety. Although the system changed, the responsibilities of workers, employers, and suppliers did not.

Chemicals that fell under the 1988 WHMIS legislation were called “controlled products”. However, under the 2015 WHMIS legislation “controlled products” will now be called “**Hazardous Products**”. The 2015 hazard symbols are now called **PICTOGRAMS** and will be enclosed inside of a **RED** colored **DIAMOND** shape.

In 2015 three symbols have changed their representation/identity compared to the 1988 WHMIS legislation. These three symbols are “Exploding Bomb”, “Health Hazard” and “Exclamation Mark”. The “Biohazardous Infectious Materials” symbol will still remain the same and will still be enclosed inside of a **BLACK** colored **CIRCLE** shape.

The “Environment” symbol has been added to the 2015 WHMIS legislation which means the hazardous products may cause damage to the aquatic environment (i.e. spray painting, accidental spill, etc.)

	Exploding bomb (for explosion or reactivity hazards)		Flame (for fire hazards)		Flame over circle (for oxidizing hazards)
	Gas cylinder (for gases under pressure)		Corrosion (for corrosive damage to metals, as well as skin, eyes)		Skull and Crossbones (can cause death or toxicity with short exposure to small amounts)
	Health hazard (may cause or suspected of causing serious health effects)		Exclamation mark (may cause less serious health effects or damage the ozone layer*)		Environment* (may cause damage to the aquatic environment)
	Biohazardous Infectious Materials (for organisms or toxins that can cause diseases in people or animals)				

* The GHS system also defines an Environmental hazards group. This group (and its classes) was not adopted in WHMIS 2015. However, you may see the environmental classes listed on labels and Safety Data Sheets (SDSs). Including information about environmental hazards is allowed by WHMIS 2015.

8.9 Safety Data Sheets – SDS (2015)

Under the 2015 WHMIS legislation, Safety Data Sheets will **NOT** be required to be updated every 3 years. Instead, SDS's will be updated when significant new data become available.

In the 1988 WHMIS legislation, the minimum sections required in a Safety Data Sheet were 9 sections. In the 2015 WHMIS legislation, the minimum sections required in a Safety Data Sheet will be **16 sections**.

1. Identification (product and supplier)	9. Physical and chemical properties
2. Hazard identification	10. Stability and reactivity
3. Composition/information on ingredients	11. Toxicological information
4. First-aid measures	12. Ecological information*
5. Fire-fighting measures	13. Disposal considerations*
6. Accidental release measures	14. Transport information*
7. Handling and storage	15. Regulatory information*
8. Exposure controls/ personal protection	16. Other information

* Sections 12 to 15 require the headings to be present. The supplier has the option to not provide information in these sections.

The definition of each of the 16 sections are as follows:

1. *Identification*

Product identifier, recommended use and restrictions on use, supplier contact information, emergency phone number.

2. *Hazard Identification*

Classification (hazard class and category), label elements (including hazard pictogram, signal word, hazard statement and precautionary statements) and other hazards (e.g. thermal hazards).

3. *Composition/Information on Ingredients*

For a hazardous product that is a substance: the chemical name, synonyms, CAS No. and the chemical name of impurities, stabilizing solvents and stabilizing additives where classified and that contribute to the classification of the product. For a hazardous product that is a mixture: for ingredients that present a health hazard, the chemical name, synonyms, CAS No. and concentration. Note: Confidential Business Information Rules may apply.

4. *First-aid Measures*

First-aid measures by route of exposure as well as most important symptoms/effects.

5. *Fire-fighting Measures*

Suitable (and unsuitable) extinguishing media, specific hazards, special equipment and precautions for fire fighters.

6. *Accidental Release Measures*

Protective equipment, emergency procedures, methods and materials for containment and clean up.
